

JVC Professional announces technology partnership with NICE Systems

JVC Professional Europe Ltd. is pleased to announce a technology partnership with NICE Systems. JVC's IP cameras, the **VN-V68** series and **VN-V25/26** with mega-pixel cameras, are now functional with NICE Systems video surveillance and management systems. Integrated camera functionalities include PTZ, Dual streaming

and the camera built-in VMD.

NICE Systems is a global enterprise and security solutions powerhouse, providing solutions that enable organizations to operate in an insightful and proactive manner, and take immediate action to ensure safety and security and to improve business and operational performance. NICE security solutions are installed with thousands of enterprise-class customers worldwide. Leading security organizations around the world use NICE solutions to protect city centers, transportation hubs, enterprise campuses and critical infrastructure. NICE helps security organizations better detect, verify, respond to, investigate and resolve incidents, in order to ensure the safe-keeping and protection of assets, infrastructure, and people.

Project Manager, Hanish Shah at JVC has commented, "JVC are very excited about the prospects the new partnership with NICE will bring, offering customers enterprise-class video surveillance management solutions that meets their security needs, both today and into the future," Shah stated. "Partnering with leading VMS and IP surveillance solution providers, JVC Professional can offer more advanced digital visual security solutions."
