

JVC awarded Milestone Manufacturer Alliance Partner of the Year 2008 at MIPS

Press Release

London, UK, 17 October 2008 - At the bi-annual MIPS event in Europe during the first week of October 2008, CCTV IP video recording and display product manufacturer, JVC Professional Europe was hailed as Milestone Manufacturer Alliance Partner of the Year 2008.

JVC's Hybrid 9-channel VR-N900U and 16-channel VR-N1600U Network Video Recorders have embedded Milestone XProtect video management software. Milestone software also supports a wide range of cameras including JVC IP network cameras.

(Eric Fullerton, Chief Sales & Marketing Officer at Milestone Systems presents Milestone Manufacturer Alliance Partner of the Year Award 08 to Yash Patel, Executive Director, CCTV Europe at JVC Professional Europe Ltd.)

Henrik Friberg, VP of Strategic Alliances and Co-Founder of Milestone Systems says, "We chose JVC as a Milestone Partner because of their demonstrated openness in embracing our business model, using Milestone XProtect software for their embedded NVR solutions. At the same time, JVC has also supported using Milestone IP video management software with their network cameras in the channels that are driving the convergence from analogue to digital solutions, JVC has combined the best of the analogue and the IP world in their new line of IP cameras and NVRs."

Delighted with the success and surprise nomination, Yash Patel, Executive Director, CCTV Europe at JVC Professional Europe adds "This was a very successful event with one of our key partners Milestone and we're delighted with the award which recognizes several years work together on generating hybrid products designed specifically for the changing surveillance environment. It was also delightful to see that many other friends of JVC such as SMTechology based in the UK were also recognized by Milestone."

At MIPS, JVC showed their largest-ever range of IP equipment including the first European showing of the VN-X35U Megapixel camera promising significantly improved video quality for better response and evidence. This was shown alongside the JVC range of IP domes and network video recorders.
